

TECHNICAL DATA SHEET

ECCENTRIC FLARING TOOL PRO WITH BATTERY

DESCRIPTION

Tool case for pipe flaring. Precision tool that has been designed to make SAE 45° flares on tube sizes from 1/4" to 3/4", with a minimum of effort, guaranteeing the tightness of the connections and avoiding leaks between them.

This is an eccentric FLARING PRO with BATTERY for copper refrigeration pipes. Its ergonomically designed handle ensures comfortable and efficient work. The flaring cone, made of hardened steel, is eccentrically mounted, which, when rotated, produces a rolling action for a uniform flaring configuration.

PRESENTATION

Presented in a plastic case for easy transport and storage. Includes lithium battery, charger and five magnetic dies for flaring the tubes and two clamps for holding the dies.

BOX COMPOSITION:

- Eccentric flaring tool PRO with battery
- Molds for flaring tubes 1/4", 3/8", 1/2", 5/8" and 3/4".
- 2 pliers for accommodate the dies
- Lithium battery
- Battery charger

Box presentation (ref.4641200000)

Eccentric flaring tool PRO with battery

Technical details

Method.....by eccentric cone
Rotation speed.....280 rpm
Motor power.....DC
Battery life.....700 flared (aprox.)
Flaring time.....5 seconds (aprox.)
Type of battery.....Lithium 18V
Capacity.....4000mAh
Charging time.....90 minutes aprox.)
Rechargeable battery.....1000 cycles (aprox.)
Charging temperature.....from 5° to 40°C
Charging current type.....AC 220V-240V
Frequency charging current.....50-60 Hz
Charging intensity.....2400Ma
Weight of flaring tool + battery.....2,03Kg

Flare mould fixing clamp

Mould flaring tool

Lithium battery (4000mAh 18V)
