

NIPPLES

OBJECTIVE

The main purpose of this product is the connection of a fixed pipe with threaded ends to a mobile device for gas consumption, by a flexible tube or hose.

APPLICATIONS

The most common applications are natural gas and LPG installations.

TOLERANCES

According to UNE-60719. Threads according to ISO-228.

MATERIALS

Brass according to EN-1982, EN-12164 and EN-12165

AVAILABLE TYPES AND MEASURES

| CODE | THREAD | FINISHING | GAS TYPE | BAG |
|------------|-----------|--------------|----------|-------|
| 4307800000 | 7/8" male | Brass colour | GLP | 25 un |

| CODE | THREAD | FINISHING | GAS TYPE | BAG |
|------------|-------------|-----------|-------------|-------|
| 5831200000 | 1/2" female | chromated | Natural gas | 25 un |
| 5833400000 | 3/4" female | chromated | Natural gas | 25 un |

| CODE | THREAD | FINISHING | GAS TYPE | BAG |
|------------|-----------|--------------|-------------|-------|
| 4317800000 | 7/8" male | Brass colour | Gas Natural | 25 un |

ASSEMBLY INSTRUCTIONS

Make sure that there is no type of leak in any of the connection parts of this accessory with the pipe and the connected element or equipment.

Verify that all the connections are free of tensions, both to traction, torsion, bending, compression, or shear. In case of installations that may suffer vibrations, make sure to incorporate the necessary elements so that these vibrations are not transmitted to the pipeline or to the appliance or consumer device. If the installation can suffer contractions and expansions, incorporate into it the necessary elements so that they are compensated.

Choose the optimal size of the nipple, according to the size of the installation pipe and its flow.

Use the types of sealing materials indicated by the standards required for each application.

In case of any doubt or special application, please contact our technical department.
