

DATA SHEET

PENCIL TYPE REAMER

DESCRIPTION

It allows the manual removal of burrs and sharp edges produced by cutting the tube simply and quickly.

Very practical, the blade allows a 360° turn.

Spare blade inside.

Easy to use and carry.

Valid for all tube diameters.

TECHNICAL SPECIFICATIONS

Ergonomic handle made of PVC with a pleasant touch of 125 mm in length and 22 mm in diameter.

Blade made of HSS that allows a long useful life.

Blade angle: 40°

Blade size: 47 mm in length and 3.2 mm in Ø.

Very suitable for deburring copper, aluminium, stainless steel, PVC, plastic gutters, and for all those parts that require a later revision.
